- Enterprise-class control system;
- Control card expansion slots;
- Multiple network communication protocols;
- Embedded infrared learning module, simple debugging and maintenance;
- Onboard control ports: 8 IR/serial ports, relay ports, I/O ports and RS-232/422/485 COM ports for each.

Working with the programmable touch panels and iPad, no matter at home, in conference room or control center, this Network Programmable Control System will be second-to-none in your projects.
