

CR-ME4000

Digital conference system extension host

CR-ME4000

Size (mm) :
483 (L) X 275 (W) X 88.1 (H)

Product overview

CR-ME4000 is a conference system extension host to extend connected discussion unit together with standard controller digital conference system controller. Accessing system, single is extensible to 128 conference discussion units, while supporting multiple expansion controller cascade. The input voltage is the exchange of 110/220V. It has to undergo a high voltage (3500V) test to ensure compliance with safety standards.

Features

- The special 8 core aviation plug connection;
- Extend connection to discussion units with conference control controller.
- Accessing system, the single can be extended to 128 discussion units.
- Support 32 extended controller cascade.
- After high pressure (3500V) test, to ensure compliance with safety standards.
- The controller adopts metal material shell, with 8000V antistatic ability.
- The controller can be mounted on a 19 inch standard rack.

Specifications

Parameter name	CR-ME4000
Power supply	110V / 220VAC
The static power consumption	10W
Maximum power dissipation	350W
Output power	≤110W / 24V each road
Weight	About 6kg
Color	Dark grey
