

CR-HMP24

Digital power extension box

CR-HMP24

Size (mm):
280(L)X175(W)X53(H)

Product overview

CR-HMP24 supplies power for the extension unit. When the controller power supply is insufficient, it can realize the relay function. Support 1 input and output, 4 UN IT output, can be used to connect discussion unit.

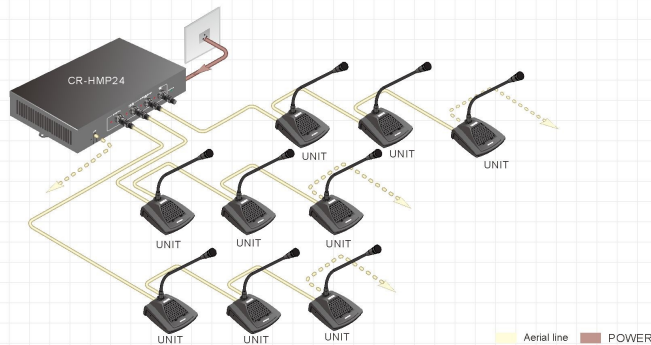

Features

- 1 power input.
- 1 UNIT input.
- 4 UNIT output, can be used to connect discussion unit.

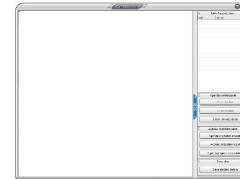

Specifications

Parameter name	CR-HMP24
Power supply	The controller power supply
Maximum power dissipation	350W
Input	1.2 meters of 8 core air line
Unit interface	Output
Output	4.8 core aerial line head
Color	Dark grey

System connection diagram

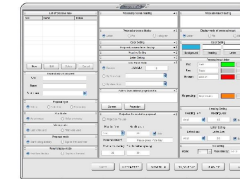

Digital conference system management software

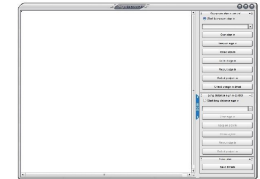

Agenda control software module

Agenda control software assigns background work like bill registration and design to related technical personnel to edit. So you can easily control the bill and program.

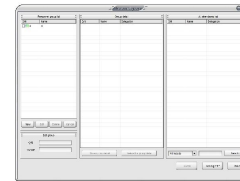

Bill editing software module

Bill editing software classifies 3 types of bill: a vote, voting and election. According to the type selection of the bill, you can set display mode of bill vote process, and bill statistical results display mode.

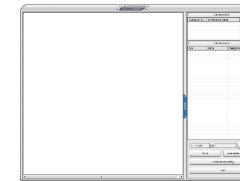

Attendance control software module

Attendance control software interface displays the actual attendance, namely, the number of people who have attended and the number of people who have not attended.

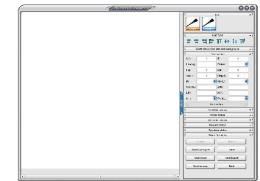

Personnel grouping software module

Personnel grouping software can group the personnel attending the meeting very well, and edit the participant's number and name. It can be used to create, edit and delete users and some other functions.

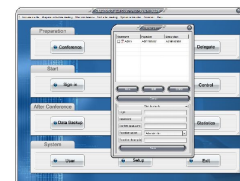

Seat arrangement software module

Seat arrangement software can assign the meeting people corresponding to the discussion units. Just use the mouse to tug names directly onto the corresponding representative or the chairman machine.

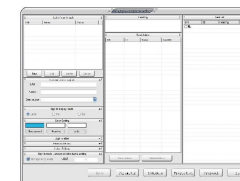

The meeting setting software module

The software settings software window provides a function to freely edit the scene, so as to set the venue size and delegates seats.

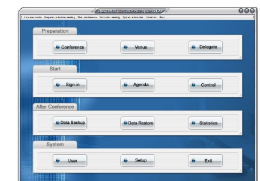

User management module

Can be used to create, edit and delete users and some other functions.

The key to sign software module

The general meeting requires the call sign. Standard digital conference system can sign through the discussion unit and software, very convenient.

Software menu module

After the successful operation of the system software, a menu will appear. You can enter a series of interfaces to create and maintain the basic meeting data, such as the agenda of the meeting, the attendance, meeting arrangement.
