CR-TWM4
4 inch wall-mounted programmable color touch panel

CR-TWM4

Product overview

CR-TWM4 is an wall-mounted programmable color touch panel. With the central controller of CREATOR, it can trigger the control of various devices such as lights, projectors, and matrixes.

Features

- Capacitive color touch control screen;
- With object proximity sensing function, when the human body is close to it to a distance of about 50cm, the screen will enter the normal working mode;
- After 60 seconds of no touch operation, entering standby mode automatically;
- The RJ45 interface supports POE power supply and communicates with the programmable control host;
- Support a variety of control panel key modes (support 4, 6, 8, 9, 16 key modes);
- The text can be configured through the setting software.

Size (mm):
206（L)X145（W)X29.8（H)

Specifications

The parameter name	CR-TWM4
Communication method	Adopt CR-NET or LAN communication
Screen material	Capacitive IPS touch screen
Screen size	4.0 inches
Screen color	16.7M colors
Screen resolution	480*480 pixels
Number of keys	4, 6, 8, 9, 16
Standby power consumption	1.2W
Working power consumption	2W
Power supply	CR-NET or POE
Weight	About 150g
Dimensions (mm)	86(L) x 86(W) x 35(H)
